

CATHERINE IRETON

iretoncat@gmail.com · (816) 588-0491

Full Stack Software Developer with extensive experience across multiple programming languages and frameworks. Adept at quickly mastering new technologies and applying best practices in code development, debugging, and testing. Proficient in delivering robust front-end, middle-tier, and back-end solutions, with a focus on comprehensive test coverage. Strong communicator and collaborative team player, equally capable of taking on design responsibilities as well as implementation. Committed to continuous learning and improving processes to drive innovation and excellence in software development.

SKILLS

DEVELOPMENT

JavaScript, Angular, Typescript, React, RXJS, Ext JS, HTML, CSS, SCSS, Java, C#, C++, Docker, SQL, SQL PL, JSON, XML, UML, CCL, Jasmine, Agile, Scrum, SDLC, Splunk, New Relic, Maven, Gradle

TOOLS

Visual Studio Code, Fiddler, JIRA, Git, WSL, Storybook, Eclipse, Spring Tool Suite, Visual Studio, SOAPUI, Oracle SQL Developer

TRAITS

Resourceful, Inquisitive, Collaborative, Troubleshooting Skills, Continuous Growth, Accountability

EXPERIENCE

NOVEMBER 2020 – JANUARY 2025

Staff Front End Engineer, UPLIGHT

- Migrated from monolith application to Single-page application, implementing features and improving UI responsiveness for mobile usage
- Utilized Storybook to share components in isolation for easy verification of behavior and appearance
- Developed a sharable design library of Angular components with multiple customizable options
- Used Jasmine to write unit tests for greater code coverage and reliability
- Member of Women in Technology group

MARCH 2019 – NOVEMBER 2020

ASSOCIATE SENIOR SOFTWARE ENGINEER, CERNER

- Led newly created team responsible for modernization of security products
- Responsible for backlog prioritization, story creation, and release planning
- Provided support for Win32 applications using C# and C++
- Developed queue-based services using IBM MQ and Java
- Leveraged Docker containers for services and Gradle builds
- Created CCL (Cerner's proprietary SQL-based language) applications for database-related actions and queries
- Cerner Hackathon Winner – 2020

SEPTEMBER 2018 – MARCH 2019

FREELANCER, Spire (Upwork)

- Created responsive Apigee Developer Portal using Angular and SCSS
- Designed APIs using Apigee API Management Tool
- Defined API Specs using OpenAPI

JUNE 2013 – FEBRUARY 2019

SOFTWARE ENGINEER, DST SYSTEMS

- Developed new web applications using Java, Ext JS, JavaScript, SQL PL, and Angular
- Utilized wireframes to for web-based application theming and component placement
- Soap service development with Spring WS, Spring MVC, and Spring Boot
- Responsible for various design aspects of the application – used UMLet
- Collaborated with team in backlog grooming and sprint planning sessions
- Provided technical documentation for knowledge sharing within and outside the group
- Utilized Spring Tool Suite, Visual Studio Code, and Git during development
- Tested code using Jasmine, Junit, and manual tests
- DST Hackathon Winner - 2017

EDUCATION

MAY 2010

BACHELOR OF SCIENCE, COMPUTER INFORMATION SCIENCES, WASHBURN

Member of WU Student Computing Club

DECEMBER 2009

BACHELOR OF ARTS, PSYCHOLOGY, WASHBURN

Member of Psi Chi
